when attached to one surface of 3mm Annealed Glass.**

**Test Report No. 2907/02 by: Jacob & Associates  
313 Canterbury Road, Canterbury NSW 2144 Australia.**

Please note that this certificate applies only to the suitability of the composite material. The use of such safety glazing material is then covered under strict guidelines contained in Australian Safety Standard AS1288. It is the installer's sole responsibility, *Duty of Care*, to ensure that this product is used in accordance with those guidelines. Oceania Distributing Pty Ltd will not accept any responsibility or liability or consequential damage for the installation of Safe PlusT window films. Copies of the relevant Australian safety standards are available from Standards Australia offices located in all major capital cities.
