## American Standard Window Film offers you a level of protection from vandals

Graffiti is an eyesore that damages your property, business and bottom line. Anti-Graffiti films can be engaged as a sacrificial shield to protect glass and most any smooth surface. This thin, invisible layer can be deployed to protect storefronts, elevators, table tops and restroom surfaces from intentional or incidental damage.

ASWF Anti-Graffiti Films utilize a special adhesive that facilitates easy removal and replacement by a professional installer following damage to the surface. The damaged film, acting as a sacrificial shield, is removed revealing the protected original surface. A fresh layer of ASWF Anti-Graffiti film is then applied to the pristine surface for protection from future damage.

ASWF Anti-Graffiti films also offer an additional layer of protection by blocking up to 99% of the sun's damaging UV rays that contribute to the fading of interior furnishings, fixtures and valuable merchandise.

Additional protection is rendered as the film mitigates damage of broken glass by containing dangerous shards in the event of accidental breakage protecting employees and customers.

ASWF Anti-Graffiti films incorporate a proprietary Dura-Slide hard coat system that feels and appears like glass to vandals. As such, the vandal will deface the surface and move on never knowing that the permanent surface remained free from marking or damage. With quick replacement of damaged film with new Anti-Graffiti film, your business is spared the cost of glass replacement and the loss of goodwill from unsightly graffiti.

Consult your ASWF dealer to engage Anti-Graffiti film to protect your business.

Available in 4-mil, 6-mil, and 7-mil thicknesses.
